TESTIMONIALS

Sarah Rich

Excellent practise!

As a longstanding patient of this practice I would like to say a big thank you to Saving Smiles, Rushden. Having recently undergone successful treatment to repair a "tricky", ageing back tooth, as always, the courtesy, patient care and support provided by Fahd and his Team was exemplary. My procedure was carried out painlessly and Fahd's attention to detail was amazing. Whilst carefully and diligently reshaping my new tooth, it seemed as though he was sculpting a piece of art to perfection! Needless to say, I am extremely pleased with the result and I would like to extend my thanks once again and wish everyone at Saving Smiles, Rushden a lovely Christmas and a very Happy New Year!

Dennis OKane

New patient moved from my last dentist which resembled a cattle market, received excellent treatment from Sabina with two Biodentine fillings took her time and was pain free also very nice dental nurse assisted Sabina. Thank you see you in two weeks.

Kristian Longden

Fantastic service from Dr Ryan over the last few weeks as I underwent a root canal and crown. Thank you!

Alistair McKenzie

I had my 6th month check up today with Kiran , I told her I was nervous and dreaded the dentist 😬 she was totally understanding and kind and explained everything.

Robert Lee

Fahd Khan is by far the absolutely best Dentist in the UK. He always takes the time to explain clearly what is going to happen and better than that he also listens to you when you have extra questions.

Thoroughly deserving of 5 stars, I would give him six if I could.

Nathan Clarke

My 1st time there since losing my NHS dentist I'm on private staff are amazing friendly no issues treatment is starting highly recommend to anyone

Easter without Cavities

- Confining the eating of sweets, chocolates and sweet desserts to meal times helps to neutralise the negative effects on teeth at one time.
- Continually exposing teeth to food can damage the tooth enamel which usually occurs when you nibble on sweet, sugary snacks in-between meals.
- Be aware eating toffees and hard sweets can compromise fillings
- Allow 30 minutes before brushing teeth after eating as your enamel is still vulnerable to damage.
- Despite the excitement of the change in routine, make sure you don't neglect brushing your teeth twice each day.

PRACTICE NEWS

Sharon turns 50!
As we reflect on the journey of Saving Smiles, it's impossible not to be in awe of the dedication, passion, and hard work that Sharon has brought to our Saving Smiles family.

Over the years, she has not only been an integral part of our team but has also been a source of inspiration and joy for all of us. Her unwavering commitment, contagious enthusiasm, and unwavering positivity have left a persistent mark on each and every one of us.

**900 patients seen
and over 2000
teeth extractions
carried out.**

Dr. Shah and his two sons have returned from Mozambique where they delivered dental care and oral health education to disadvantaged rural communities through a dental charity.
